## PROJECTS

### WeatherApp

A responsive web application developed with React, tanstack/react-query and Axios to fetch real-time weather data from the OpenWeatherMap API based on user-input city names.

### Taskifies - (Typescript with React JS)

A todo list web application using TypeScript and React. Utilizing React hooks for state management, typescript to ensure type safety and Tailwind CSS for modern UI design.

### DashboardApp

A React-based web application designed for e-commerce analytics. It utilizes React Router DOM for navigation and Recharts for data visualization.

### LawConnect

LawConnect is a responsive web application using React.js and Tailwind CSS to facilitate seamless access to legal services and information.
